

1 **EC TYPE-EXAMINATION CERTIFICATE**

2 Equipment intended for use in Potentially Explosive Atmospheres Directive 94/9/EC

3 Certificate Number: **Sira 05ATEX1280** Issue: **6**

4 Equipment: **R and M Series Optical Shaft Encoders**

5 Applicant: **Hohner Automation Limited**

6 Address: **Unit 15
Whitegate Industrial Estate
Wrexham
LL11 8UG
UK** (The products bearing this certificate number may be manufactured at any Hohner facility that has a Quality Assurance Notification and has been audited for the manufacture of the types of protection associated with Sira 05ATEX1280, see Condition of Certification.)

7 This equipment and any acceptable variation thereto is specified in the schedule to this certificate and the documents therein referred to.

8 Sira Certification Service, notified body number 0518 in accordance with Article 9 of Directive 94/9/EC of 23 March 1994, certifies that this equipment has been found to comply with the Essential Health and Safety Requirements relating to the design and construction of equipment intended for use in potentially explosive atmospheres given in Annex II to the Directive.

The examination and test results are recorded in the confidential reports listed in Section 14.2.

9 Compliance with the Essential Health and Safety Requirements, with the exception of those listed in the schedule to this certificate, has been assured by compliance with the following documents:

EN 60079-0:2004	EN 61241-0:2006	EN 13463-1:2001
EN 60079-1:2004	EN 61241-1:2004	EN 13463-5:2003

10 If the sign 'X' is placed after the certificate number, it indicates that the equipment is subject to special conditions for safe use specified in the schedule to this certificate.

11 This EC type-examination certificate relates only to the design and construction of the specified equipment. If applicable, further requirements of this Directive apply to the manufacture and supply of this equipment.

12 The marking of the equipment shall include the following:

SCHEDULE

EC TYPE-EXAMINATION CERTIFICATE

Sira 05ATEX1280
Issue 6

13 DESCRIPTION OF EQUIPMENT

The R and M Series Optical Shaft Encoders are manufactured from stainless steel; they are cylindrical in shape and comprise a main body and a cover. The cover is secured to the main body by five, M3, socket head cap screws. The main body contains a PCB assembly and has an M16 threaded hole on its sidewall, towards the base, that will accommodate a suitable cable entry device. The cover contains a shaft and bearing assembly to facilitate the equipment's measuring function.

Design options

- The Optical Shaft Encoders may be manufactured from aluminium (not Group I).
- The cable entry point may be in the base of the main body.

Variation 1 - This variation introduced the following changes:

- i. The recognition of alternative assembly sites in Brasil and Canada.
- ii. Dimension change on drawing RR-LD-001-02.

Variation 2 - This variation introduced the following changes:

- i. Following appropriate re-assessment to demonstrate compliance with the requirements of the EN 61241 series of dust standards, EN 50281-1-1:1998 was replaced by EN 61241-0:2006 and EN 61241-1:2004 and the product markings were updated to show the following:
Ex tD A21 T92°C
- ii. Instructions appertaining to the permissible manufacturing sites replaced specific addresses.

Variation 3 - This variation introduced the following changes

- i. The reduction of the outside diameter of the enclosure

Refer to Certificate Annexe.

14.2 Associated Sira Reports and Certificate History

Issue	Date	Report no.	Comment
0	19 May 2006	R51L14237A	The release of the prime certificate.
1	12 September 2007	N.A.	This Issue covers the following changes: <ul style="list-style-type: none">All previously issued certification was rationalised into a single certificate, Issue 1, Issue 0 referenced above is only intended to reflect the history of the previous certification and has not been issued as a document in this format.The correction of typographical errors.
2	15 November 2007	R51L14237C	Report number R51L14237A was replaced by R51L14237C to clarify model numbers.
3	13 February 2008	R51A17730A	The Introduction of Variation 1.
4	26 August 2008	N.A.	The number of the replacement report that was introduced by Issue 2 was corrected.
5	30 November 2009	R51L14237D	The Introduction of Variation 2.
6	12 May 2010	R51L21987A	The Introduction of Variation 3

15 SPECIAL CONDITIONS FOR SAFE USE (denoted by X after the certificate number)

None

16 ESSENTIAL HEALTH AND SAFETY REQUIREMENTS OF ANNEX II (EHSRs)

The relevant EHSRs that are not addressed by the standards listed in this certificate have been identified and individually assessed in the reports listed in Section 14.2.

17 CONDITIONS OF CERTIFICATION

17.1 The use of this certificate is subject to the Regulations Applicable to Holders of Sira Certificates.

17.2 Holders of EC type-examination certificates are required to comply with the production control requirements defined in Article 8 of directive 94/9/EC.

17.3 The products bearing the certificate number Sira 05ATEX1280 shall only be manufactured at a Hohner facility that has a Quality Assurance Notification issued by a notified body and has been audited for the manufacture of the types of protection associated with Sira 05ATEX1280 (Note: the actual name and address of the manufacturer together with the number of the notified body associated with their Quality Assurance Notification shall appear on the product label.)

This certificate and its schedules may only be reproduced in its entirety and without change.
